Experiment 2

Title: Blink PG13 and PG14

Aim: Blinking 2 LED's using STM32CubeIDE using ReadPin(), WritePin() and TogglePin().

Tool used: Tool used for this assignment is **STM32CubeIDE**.

Procedure:

1. Create a new STM32 project with a suitable project name.

2. IOC UI will open in that configure desired pins as input/output.

3. Press Ctrl+S to generate the code.

4. In the main.c file add the desired code.

5. Go to Project-> Build Project.

6. Connect the discovery Board and go to Run-> Run.

#endif /* USE_FULL_ASSERT */
```

Output:

Functions used:

HAL_GPIO_TogglePin (GPIOx, GPIO_PIN_Number);
HAL_Delay (In ms);

Result:

Basic STM32Cube project for blinking PG13 and PG14 LEDs was built using
STM32CubeIDE.
